

## THE LORMA LAB: GIVEN “EXCELLENT” RANKING

*The Amianan Tribune, Oct 29 to Nov 4, 2011*

SAN FERNANDO, LA UNION—The Lorma Laboratory scored “excellent”, according to the National Kidney and Transplant Institute, which administered the National External Quality Assessment for Hematology in 2010. The Lab also passed the quality testing in Microbiology as confirmed by the Research Institute for Tropical Medicine.

Like other licensed laboratories, the Lab is required by the Department of Health to undergo external quality control. This ensures that laboratory procedures are done in accordance with standards, and that laboratory results are accurate. In addition to passing the external assessment, the Lorma Lab is accredited by the Department of Health as a Tertiary Clinical Laboratory, a Drug Testing Laboratory, and an HIV Laboratory. It also achieved the ISO 1900:2008 accreditation in 2010.

The Lorma Lab has the most lab tests in northern Luzon. It also does a high number of drug tests. Lab informatics is used to keep track of individual patient or specimen histories. Laboratory results are compiled and kept for fifteen years. When you use the services of the Lorma Laboratory, you can be assured of tamper-proof, accurate, affordable, and complete quality testing.
